

Monitor Tech Training Program

Pacific Medical Training offers training for current and prospective Monitor Technicians/ECG Technicians. This training is given in two parts and the syllabus for each part is listed below. Our students which successfully complete both parts are endorsed to work professionally in these roles.

Our training program, monitortech.org, is recognized as a Recommended Review Program by the Cardiovascular Credentialing International and is listed on their website at: <http://cci-online.org/content/review-programs>

Arrhythmia Interpretation

This is a course for health care providers aspiring to the ACLS course or for provider working in a "monitor technician" position.

- SECTION A: Anatomy and Physiology of the heart
- SECTION B: What is the Electrocardiogram?
- SECTION C: Rhythms Originating from the Sinus Node
- SECTION D: Rhythms Originating in the Atria
- SECTION E: Junctional Arrhythmias Including Heart Blocks
- SECTION F: Rhythms Originating in the Ventricles

12 Lead Electrocardiography (ECG)

This is a "200-level" course for health care providers working in a telemetry unit. It will also be useful for working in operating rooms, emergency rooms, and for cardiologists.

- SECTION A: Summary of Significance
- SECTION B: Configuring the Axis and Leads
- SECTION C: Ischemia
- SECTION D: Injury
- SECTION F: Ventricular Tachycardia (VT) VS Supraventricular Tachycardia
- SECTION G: Electrolyte Disorders Reflected in ECG Changes

For more information on these courses, please see our website at monitortech.org
